Quintum has developed a complete line of intelligent Tenor VoIP access switching and gateway solutions that are deployed in enterprise and service provider networks around the world. The Quintum Tenor® solution is the only product that offers **Survivability** to assure telephony communications remain live in branch office locations, even if the IP PBX network fails; **Unmatched protection of voice quality** and availability; **Ease of Ownership** with scalability, security and remote management capabilities; **Ease of installation** because Tenors are designed to fit into virtually any network offering and compatibility across PBX and IP PBX environments and **Lower TCO** because Tenors require no PBX modifications, no additional equipment, and no provisioning expenses.

Quintum offers solutions ranging from 2 to 48 analog VoIP ports, from 1 to 32 T1, E1, PRI spans and 2, 4 or 8 BRI/ST ports, as well as Session Border Controllers and a Remote Management Session Server for easy management of remote Tenors, even those behind NAT firewalls.
